Every week a free version given to a 3DLetter Facebook page fan. Be the next one and become a fan!

## ● Play with 3D letters and create 3D design

You want to create your own design in 3D, playing with 3D letters and figures ?

No need to be a geek or a designer. Just play with this software: you will be able

- to write a text in 3D

- move / rotate / resize your letter in the space on the three axes,

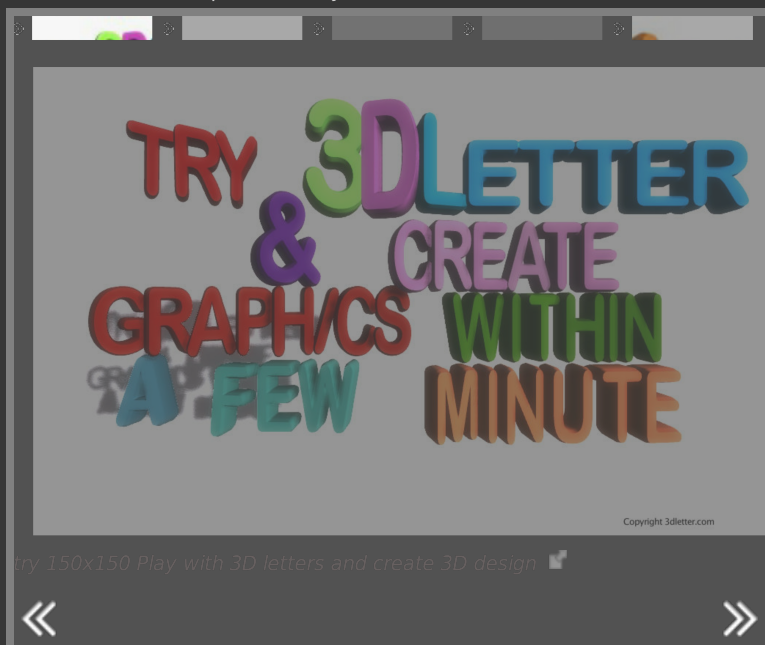

- to choose the color of each letter or figure, and customize it,

You can eventually export your design as a jpeg file (functionality available on the download version). Use your design to customize your mobile background, your Facebook or e-mail logo, create invitations or birthday cards .....

Have a try on the "Try-it" page or go on the [download page](#).

Comments and feed back are welcome.

Here are some examples of what you could do..
